## ROEQ L150 Lifter System

The ROEQ L100 is developed to support internal logistics in industry and health care facilities.

The basic functionality is to use MiR100™/MiR200™ with the Lifter Top Module to move goods between logistic points.

The Lifter Top Module can be customized to support a variety of pallets and fixtures that are already a part of an existing assembly flow.

### Application interface

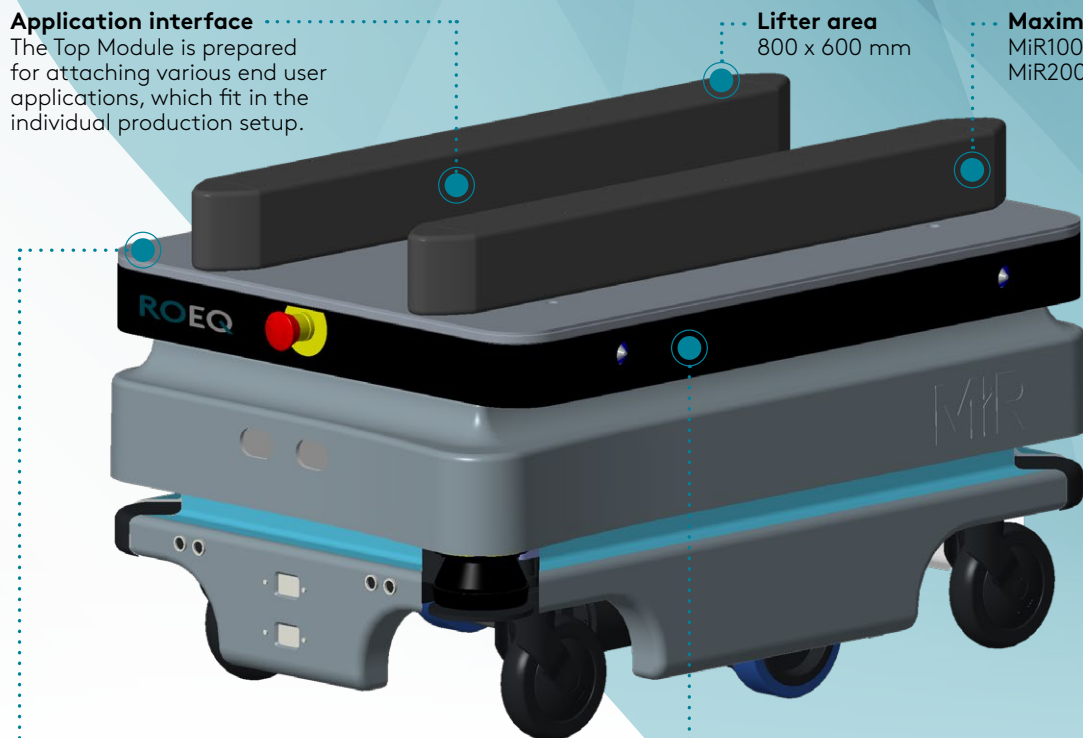

The Top Module is prepared for attaching various end user applications, which fit in the individual production setup.

### Lifter area

800 x 600 mm

### Maximum payload

MiR100™: 75 kg  
MiR200™: 150 kg

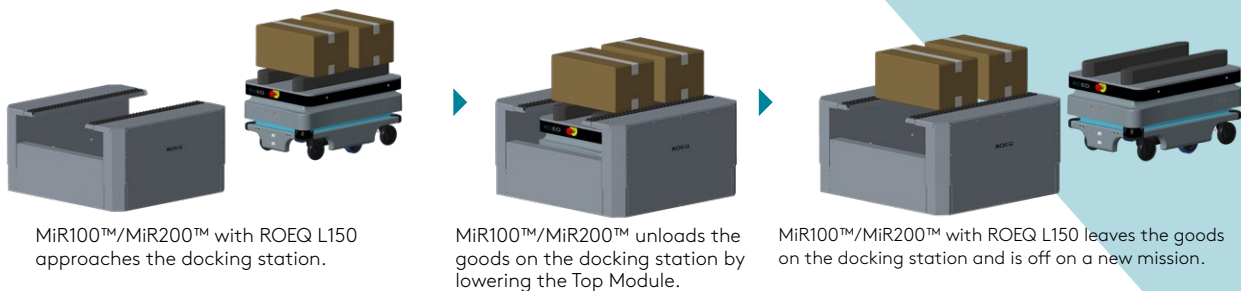

### Docking

When MiR100™/MiR200™ arrives at the docking station, the lifting mechanism enables the loading and unloading of goods to e.g. an assembly line.

### Top Module (TML 1)

The Top Module has a built-in lifting mechanism that enables easy pick up of packages, pallets, fixtures etc.

This is how the ROEQ L150 lifter system works
